FOR SAFE AND ECONOMICAL CALF REARING

The basis for an early maturing, highly productive cow is laid during the first months of its life. Therefore selection of a good milk replacer is of great importance. The high quality milk replacers Denkamilk Extra and Denkamilk Top S, manufactured by Denkavit, are the obvious and cost-effective choice.

For more information contact your local supplier or www.denkavit.com

Denkamilk Extra Denkamilk Top S

Why colostrum?

Colostrum is absolutely essential for the newborn calf. The first colostrum has to be given within 2 hours after birth. During the first few days colostrum has to be fed 3 times a day. From the 4th day onwards Denkamilk Extra or Denkamilk Top S is given.

Better than cow's milk

Cow's milk is less suitable for calf rearing. Due to continuous improvement in genetics, milk yield has increased a lot. The same applies to the fat content in the milk. The levels of vitamins, minerals and trace elements however have not proportionally increased. This is one of the reasons why cow's milk easily leads to deficiency diseases and digestive disorders.

Quality

The excellent quality of Denkamilk Extra and Denkamilk Top S is achieved by using first class raw materials of a consistent quality. These are analysed at our well equipped laboratory before entering the factory. Both products are under a daily executed control system which guarantees the quality.

Protein and energy

Denkamilk Extra contains an adequate percentage of highly digestible dairy

products, providing the necessary milk protein. Denkamilk Top S has an even higher dairy content. In both products raw materials and protein/energy balance are chosen in such a way that a stable and efficient growth and an early consumption of concentrates and roughage are assured.

Vitamins and minerals

Denkamilk Extra and Denkamilk Top S are rich in vitamins. They contain all essential minerals and trace elements in the correct balance. These micro ingredients safeguard your calves from deficiencies.

Denkamilk Extra

- Economical choice
- Optimal solubility and pleasant taste
- Carefully selected protein sources
- Adequate level of dairy products
- Full safety package including prebiotics, probiotics, essential oils and acidification
- Stimulation of rumen development

Denkamilk Top S

- Quality choice
- Excellent solubility and attractive taste
- High quality protein sources
- High level of dairy products
- Full safety package including prebiotics, probiotics, essential oils and acidification
- Stimulation of rumen development
