FOR A HEALTHY START AND A QUICK RECOVERY

An optimum rearing of young ruminants is not only a matter of suitable housing and management. A balanced diet and effective health care are equally important. As the specialist in feeds for young animals, Denkavit has developed the Denkavit concept. This series of products, which have been tested on Denkavit's research facilities and in practice, increase the vitality and resistance of the young animal, both under normal and extreme circumstances. Also recovery during or after setbacks is assisted.

Denkamix Vitalcure Denkamix Hydrofort Denkamix Vitalpect

A special product for each purpose

Denkamix Vitalcure contains the essential vitamins, minerals and trace elements to improve the vitality and resistance of the young animal quickly and effectively. This is important because extensive blood analysis conducted by Denkavit shows that approximately 30% of all newly born calves suffer from moderate to severe anaemia. The vitamin E levels in the blood of young calves often are too low as well. Vitalcure has been developed to prevent and counteract such deficiencies. Also, a treatment with Vitalcure is an obvious choice after digestive problems or respiratory disorders which have required an antibiotic treatment.

Denkamix Hydrofort has been developed to prevent and to treat dehydration. Dehydration can occur because young animals in the first few weeks after birth often do not take in enough liquid. Due to its very attractive taste, the intake of extra liquid, for example in between the two milk feeds, is easily achieved. In case of transport of young animals over long distances, causing exhaustion, the supply of Hydrofort restores the amount of electrolytes and energy to the required level.

Denkamix Vitalpect can be applied in the event of outbreaks of diarrhoea. Thanks to a unique combination of raw materials, absorbents and toxin-binding substances the damaged intestine is supported in the recovery from infectious diarrhoea treated with antibiotics. The isotonic properties of Vitalpect allow the product to be administered in milk or milk replacer, thus maintaining energy supply.

Denkamix Vitalcure

- Improves vitality and resistance

Denkamix Hydrofort

- Supplements liquid, energy and electrolyte deficiencies

Denkamix Vitalpect

- For quick recovery after digestive problems
