TUNED FOR PREVENTION AND RECOVERY

Denkamix Vamivit products are well balanced dry mixtures of vitamins, minerals and trace elements. The products can be used for several indications, depending on specific circumstances. They are tuned to support highly productive animals and to the relief of stress situations like transport or weaning. Besides this, Denkamix Vamivit and Denkamix Vamivit Plus are used as a supplement after disease and medication, to restore resistance and body condition of the animal.

Denkamix Vamivit Denkamix Vamivit Plus

High quality micro ingredients

Regarding the selection of raw materials Denkamix is well known for maintaining very high standards, followed by a strict quality control. All micro ingredients incorporated in Denkamix Vamivit have to comply with the highest possible demands on bioavailability, purity and safety. Included are vitamins A, D3, E, K, biotin, folic acid, niacin, pantothenic acid, all B-vitamins and choline as well as selenium, iron, copper, zinc, manganese, cobalt and iodine.

Advantages and performance

Denkamix Vamivit prevents and counteracts deficiency symptoms and speeds up recovery after health problems. Also fertility is enhanced and general body condition is improved.

Denkamix Vamivit Plus has been especially developed to ease parturition of sows and to prevent reduced milk yield (milk fever symptoms). This is particularly achieved by supporting the calcium and energy metabolism to stimulate the production of colostrum and milk of the sow. Therefore, the composition of Vamivit Plus significantly differs from Vamivit.

Vamivit Plus is your reliable backup for animals balancing at the top of their performance.

Application

For exact indications, application schemes and corresponding dosages contact your local supplier.

Denkamix Vamivit
